EXPLODING EXPERIMENTS AT GUNGAHLIN AND TUGGERANONG LIBRARIES

Gungahlin Library and Tuggeranong Library are hosting an exciting science show today packed with things that explode, launch and fly.

“Libraries ACT is pleased to offer *Going Ballistics* which explores rocket science like you’ve never seen it before,” said Vanessa Little, Director, Libraries ACT.

“The action packed demonstration will showcase physics and chemistry at its best, with interactive demonstrations such as rocket launches and flying eggs.”

Presented by Graham Walker from Science ShowOffs and the Australian National University, *Going Ballistics* will offer science demonstrations suitable for kids of all ages.

“This is a free and fun opportunity to learn about scientific forces, chemical reactions, the science of flight and energy conservation.”

Both science shows are fully booked but there are still places available in other school holiday programs offered by Libraries ACT. For more information visit www.library.act.gov.au

WHAT: Going Ballistics presented by Graham Walker
WHEN: Tuesday 10 January 2012
DETAILS: 10.30 am – 11 am Gungahlin Library
2 pm – 2.30 pm Tuggeranong Library

Editor’s note: A photo opportunity will be available of children participating in interactive science demonstrations. Please contact Kirsten Rae on 6205 2173 for more details.

Statement Ends
